

ACCESS CONTROL

N820

BARRIER TYPE TURNSTILE

An optical sensors controlled passageway with bars to prevent unauthorized access. Designed to be in sight of reception staff, the Argus takes the problem out of checking individual passes whilst allowing authorized persons to pass unhindered. The unit is at its optimum when used in conjunction with a hand free access system in which allows the bars to stay in the opening position until an unauthorized person is detected.

FINISHING

- Steel, painted according to RAL
 - Stainless steel, hairline satin finish
- Other models on request
