

CONTROLLER

The controller provides interfacing from associated access control devices to activate the electrical road blocker. All inputs & outputs are controlled through a 24 volt control board with all necessary with most access control devices on the market.

TECHNICAL DATA

- Height of raised obstacle: 60mm
- Length of obstacle: 2500mm - 4500mm (Optional length on request).
- Width of obstacle: 580mm
- Motor: Single Phase asynchronous type.
200W 1420rpm.
- Power supply: 220V Single phase 50/60Hz
- Operation temperature: -20 to 80 degree Celsius
- Net weight: 120 KG
- Operation speed: 1 sec.
