

## ACCESS CONTROL

# Ww-820

## BARRIER TYPE TURNSTILE

### PRINCIPLE

An optical sensors controlled passageway to prevent unauthorized access. Designed to be in sight of reception staff, the Argus takes the problem out of checking individual passes whilst allowing authorized persons to pass unhindered. The unit is at its optimum when used in conjunction with a hand free access system in which allows to stay in the opening position until an unauthorized person is detected.

### FINISHING

- Steel, painted according to RAL
  - Stainless steel, hairline satin finish
- Other models on request

### READER INTERFACE

Compatible with access control systems standards

- Serial interfaces
- Fieldbus cross linkage

Special interfaces, signal exchange with building services automation and connection of customer supplied control elements available on request. Export variants on request
