

## OPERATION

Detection of photo sensors through Main Controller

Indication of Red or Green LED for access

### Entry Direction

- clear
- audible & visible alarm
- electrically controlled
- by an access control system
- manual

### Exit Direction

- clear
- audible & visible alarm
- electrically controlled
- by an access control system
- manual

## CONSTRUCTION

Casing and guiding tube sheets of high-quality structures.  
Glazing: 10 mm tempered glass or acrylic

## ELECTRICAL EQUIPMENT

Control integrated in the unit supply: AC: 220V-250V Frequency: 50 Hz

## OPTIONS

- Built-in of Smart Card Readers
- Signal equipment
- Control Desk Panel for remote control (release & block)
- Modes selection switch
- Railing elements for flow guidance design
- Counting mechanism
- Coin (Token) acceptor
- Security Coin box with vault
- Integration of other device(s)
- High intensity LED for display
- Photo sensors beams in vertical & horizontal for the prevention of tail-gating
